I engaged Jay to provide a mould evaluation and testing at my house due to delays with my insurance after Cyclone Alfred. I subsequently have engaged him for further testing to validate remediation. Jay really goes above and beyond for his customers. He is always willing to take the time to explain things, to offer solutions and to help calm my anxiety. His reports are detailed, well documented and his testing is robust. During my AFCA complaint the case manager found Jay's report more persuasive than the insurer's hygienist's report (which was very basic in comparison and used a less reliable testing methodology). I am so incredibly appreciative of all the advice he has given me over the last 12 months, and highly recommend him for anyone going through a protracted or contentious insurance claim involving water damage and mould.

We are very pleased that you have made the decision to call in a specialist to investigate the problem that has arisen due to the negligence of the manager servicing our rented property. It took only a few minutes to find the source of all our mold-related problems that had spread throughout the house. Jay took the measurements necessary for laboratory research and just a few days later it became clear that it was not our fault that we got poisoned by mold in the rented house. Moreover, we learned what serious damage can be caused by a manager's careless attitude towards someone else's property. Thank you very much Jay. The results obtained will not only help us get our Bond back, but most likely also force the guilty party to pay compensation for the damage caused to us.

I'm so grateful for the amazing help I received today! from Dipali Raval Even before their shift had officially started, they went out of their way to assist me with my request – that kind of dedication and care is truly rare. It shows how committed they are to their work and to helping others. Thank you so much for going above and beyond – you really made my day!
Thank you so much Dipali

Had the opportunity to attend a training course of Jay and his team. Even after the course, he was giving of his knowledge. Whether it's was Workplace & Health Safety /Mould or Fire Investigation, he made the difficult & complicated, easy to understand. He not only had a solution but how to implement it. These guys know their stuff and are super helpful. 🙌

Jay has been a great help in proving that remediation performed in my home did not remove all the mould. The service I received from everyone was prompt, professional and friendly. I highly recommend this company.

We engaged Jay to carry out Mould and hygiene testing on our home after suffering storm damage. After months of fighting insurance and multiple denials, and insurance reports that lacked substance as well as suffering many health problems living with mould we knew we had to get our own testing done. Jay went above and beyond and took his time explaining the hazards we were living with and conducted a very thorough report and expressed his concern for us living in the home with our children. When results came back it explained everything, numbers off the charts. 1yr and 9 months later, a resolved insurance claim and Mould restoration Jay came back to give us the all clear with final testing. Again he was very accomodating and thorough, and was guiding us and the restoration team every step of the way towards successful result of of Mould remediation. We got the all clear and had full confidence knowing Jay was on the job. Don't mess with your health when it comes to Mould, get Jay in and know where you stand. Will be the best thing you've done.

WE WORK WITH QUEENSLAND'S FINEST
